PROFILE

Frontend-focused software engineer with 12+ years of professional experience building responsive interfaces for government applications and commercial websites. Strong in translating designs into practical, polished UI. Independently built and launched a full-stack social platform, extending hands-on work across APIs, relational data, and cloud deployment. Brings a creative eye and particular strength in Photoshop.

TECHNICAL & CREATIVE SKILLS

Frontend: Vue.js, TypeScript, JavaScript, HTML, CSS, Less, responsive design, cross-browser testing

Backend & delivery: C#, REST APIs, SQL, Entity Framework Core, Azure, Git, GitHub Actions

Creative: Photoshop (strongest creative tool), Illustrator, Premiere Pro; visual design and video editing

PROFESSIONAL EXPERIENCE

Cydecor | Software Engineer Level 2

May 2018 - September 26, 2025

- Led frontend development of responsive government web applications using Vue.js and CSS, supporting desktop and mobile interfaces.
- Designed and implemented C# REST APIs and integrated frontend features with backend systems and databases.
- Collaborated across teams on delivery and architecture planning; reviewed code, debugged issues, and improved application reliability and maintainability.

Dominion Enterprises | Responsive Web Developer

November 2013 - May 2018

- Built responsive websites for independent powersports dealerships on the DX1 platform, translating design-team layouts into working interfaces.
- Used HTML, CSS, and JavaScript to support phones, tablets, and desktops; tested and debugged layouts across browsers and devices.
- Worked with backend developers to connect frontend features with server-side functionality.

INDEPENDENT PRODUCT DEVELOPMENT

Live social platform | Independent developer

- Took a product from concept to public launch, building its responsive Vue and TypeScript interface alongside C# REST APIs, SQL data storage, and Entity Framework Core data access.
- Deployed the application and backend services to Azure using GitHub Actions workflows, and continue developing and refining the product.
